The resolution, in the face of all the actions of the present Board of Supervisors, in view of the established precedents and usage of former Boards, and never until now questioned by the present Board, comes with a bad grace from the gentleman who offered it, and cannot be placed on the grounds of economy. The services now performed are no less—they may be more—than that performed by prior Sherifis, and the singling me out as the recipient of such a charge

aking of a maletous nature, and can only be explained by the fact that other and personal, private motives form the basis of the Supervisors' charges.

All the rest were carried triumphantly. The majority for the Constitution in Leaven-work on the Lagrage of the services performed. During the six months last past I have expended over one hundred dollars, being amount paid in procuring witnesses and serving aummonases in the many People's cases, for which I have never received one cent, and which this very Board to Supervisors have informed me I cannot collect, as they know of no law giving them the power to appropriate for such services. They can conceive a power in them to appropriate near four hundred dollars for an extra police fore at the late National Fair—which society now boasts of a profit of \$20,000. The tax payers of Cook County may conceive it right that they should pay such an appropriation to enrich the coffers of ethers. They may also conceive it well that the same Board should send into the Canadas and extreme Eastern cities for with the Constitution of this fees, how they should pay such an appropriation to enrich the Sheriff of this county a return of the honest amount he has expended in catching the cattle this even and other malefactors that infest their very doors.

The same with a date and continued and investigated with the same of the same This resolution is a flat and emphatic repudiation of the Douglas dogma, and the two delegates are hostile to his Presidential aspirations. The Times has claimed Massachusetts for its master in the Charleston Convention, and soute the idea that any other candidate could get a vate in the Old Bay State. What excuse has it now to effer for this defeat? Half the delegation of Maine is openly opposed to Douglas, and he has a very size chance of getting a single vote from Connecticut; as Secretary Toucey is his arowed enemy, and Bishop will fight him tooth and nail. These men are potent in the little Nutung State; besides which, the bulk of the Democrats of Connecticut are "hard shell" in sentiment, and have never aympathised with the conquered "rebel." The other New England States are light in weight and uncertain in their attachments; but they are too shrewd to worship a setting sun. A decided majority of the New York delegation are for any one of a dozen named candidates before Douglas, and the majority of the instructed to cast the voteof the whole delegation. The Democratic politicians of the Empire State, Softs as well as Hards, have never felt any confidence in Squatter Sovereignty; they have regarded it from the first as an untenable humbug, that would not answer in the sunty of the New York delegation are for any one of the majority of the New York delegation are for any one of a dozen named candidates before Douglas, and the majority of the New York delegation are for any one of a dozen named candidates before Douglas, and the majority of the New York delegation are for any one of a dozen named candidates before Douglas, and the majority of the New York delegation for the sea, his father, a respectable yeoman, procured him a mid-abipana's commission in the navy. After dinner, air. Loupy went up actis, and his, daughters, with their guest, withdrew to another apartment. While engaged there in conversation, Mr. Leupp entered, hastened to his daughters, embraced them wildly, and hur-ried away. But a few moments after this the discharge of a gun was heard. Mr. Cook ran up stairs, and found that Mr. Leupp had shot himself, and that death had immediately fol-lowed. though we cannot dare to hope that one of the

himself, and that death had immediately fol-lowed.

Mr. Leupp's bedroom is in the north-east corner of the house, and is connected with a dreasing-room, also furnished with apparatus for bathing. In this inner room the unfortunate man was lying, stretched upon his back, with a double-barreled gun lying across his body. It is supposed that Mr. Leupp, while standing, placed the muzzie of the gon against his breast, and touched the trigger with his ramod. The shot passed directly through his heart, and though it was but a minute, after the report, before his friend was at his side, life was quite extinct. Frankin's first Arvice expedition was made in 1818, with the distinct object of finding the North Pole. In company with Capt. Buchan he sailed northward between Greenland and Spitzbergen, to the unexampled altitude of 84 deg. 24 min., where he became imbedded in the ice, executive of his ships, which was crushed in the ice. extinct.
In the death of Mr. Leupp the community In the death of Mr. Leapp the community has smifered an essential loss. To say of him that he was one of our ablest merchants, is to express the least of the commendations to which he was entitled. He was one of those whom the maxims and habits of trade nad never corrupted—a man of open and generous temper, who abborred every form of deceit and every unfair advantage; sensitive to blame almost to excess, yet never to be driven, by blame, from any course which he thought right. The only results of this expedition were some interesting experiments on the elliptical figure of the earth, on the refraction of air in high

Obliged to retrace their sieps, they teached York Factory in July, 1822, after an absence of three years, during which they had traveled 5,500 miles, and suffered incredible hardships, such as eating the remains of their old shoes, subsisting on rock tripe and mosses, and sleeping on the ground with no covering but a blanket and a deerskin, and the thermometer at fifty-seven degrees below zero.

Franklin's third expedition was undertaken in July, 1825, in company with Dr. Richardson, Lieut. (Sir George) Back, Mr. Kendall, and Mr. T. Drummond. The design of the party was to proceed from Fort Chipewyan, on the north of Athabasa Lake, to Great Bear Lake, and thence to the mouth of Mackenzie Rivet. Here they were 'to separate, one party (Franklin's) to proceed weatward, and the other (Richardson's) castward. Franklin penetrated as far as Return Reef, longitude 194 deg. 57

ocratic Convention of the First Congressional District of Massachusetts, on Tues-day last, elected William C. N. Swift, and Ed-ward Merrill, both of New Bedford, delegates to the Charleston Convention. Resolutions were passed which seem to afford neither aid nor comfort to Mr. Douglas. The substance of the res-olutions is as follows:

people of the Ferniory, that his people of a Ferritory, when they come to exercise their sovereignty in the formation of a State Constitution, have a right to mould the institutions of the nascent State to suit themselves; but deaying that a Territorial Legislature, the creature of Dongress, can do what Congress cannot do that is, either erect or abolish the institution of slavery within the Territory.

The Augusta (Me.) Age publishes complete returns of the votes for Governor at the recent election, the footings of which are as follows:

Morrill, Rep. 56,315; Smith, Dem., 44,345—
Morrill's majority, 11,970.

—The Democrats of Hickman County, Kr., have nominated the Hon. James Guthrie for the Presidency; and the Shreeppert (La.) Gesette nominates the Hon. John Slidell for the same office.

—A Georgia correspondent of the New York Herald writes the following in relation to the condition of things political in Georgia.

There is a great division of sentiment among the Democrats of Georgia in regard of Douglas. In addition to Mr. Toombs, it is understood that Mr. Stephens and Mr. Wright, late members from this State, together with the Augusta Constitutionalies, Macon Tiespraph, and other papers, are in favor of his nomination. On the other hand, the Southern rights wing of the party, (far the most numerous.) with many Union the Democrats of Georgia in regard of Douglas. In addition to Mr. Toombs, it is understood that Mr. Stephens and Mr. Wright, late members from this State, together with the Augusta Constitutionalist, Macon Tilegraph, and other papers, are in a word of his notalisation. On the other hand, the Southern rights wing of the party, (far the most numerous,) with many Union Democrats, are as bitterly oppsed to him. Another element of discord is the contest now waging by Mr. Iverson's seat in the United States Senate. Johnson has the support of the Douglas people, while Iverson represents, for the most part, those who are opposed to him. If the election should take place this winter, Iverson will probably be re-elected. One of the most puzzling questions now being addressed to the Democratic candidases for Congress is, whether they would support Mr. Douglas if nominated at Charleston? In addition to Mr. Gartrell, Mr. Speer, the nominee of the Third District, has answered that he would not vote for him if neminated by a thousand Charleston. Conventions. Mr. Jones, the nominee of Mr. Stephens' old d strict, has replied vaguely, that he would support him sooner than he would a signature of the signature of

One of the convicts brough up by Sheriff Kessler is a young man of size than ordinary talent who has given himsel up to various species of vice, and proving in host instances an adroit rascal. He gave his man as Daniels, but is known to be the son of a Connecticut Judge named Frice, a gentheman of prisble reputation on the Bench of that State. Young Price left home for Philadelphia, which be entered the law-office of the distinguished bayid Paul Brown and afterward was in the offe of John W. Forney. He was convicted of crips in Philadelphia and served a term is Moysansing prison, and coming West, had not been function in three hours before he was detected in issuing counterfeit money, and is now setenced for seven years to the peniteutiary I this State. His settence, it is thought, wonk have been for a longer period had the fact ne been proven that Price had served several years in the navy of the United States in a mange creditable to himself and friends, as was evilanced by the honorable discharge, by Mr. Tomy. Price was also a short time with Minister Reed, in China, but did not high the country, and returned earlier than was at first intended.

A Coon in Churacu—Genay Plutter Anone politics, has the following may be said to be news to us:

There are than was at first intended.

A COON IN CRUECH—GRAY PAUTTER ANONG THE CHINGLINE—A FACCOS with a continuation of enormous size, extered the Baptist Church on Sunday evening last during service, and immediately betook immedia to devotional attitudes among the ladies dresses. Thereupon, sundry drawing up of inory ankies, getting up on the seats, and out of doors, accompanied with the aimouncement of "Coon in the Church" presented a scene for merdment to the boys, grave humor among the ladies. Finally his coneyabip was captured by a daring gentleman, and was carried from church by the mape of the ack." Poor coonsy! Is devotion couldn't be appreciated.—Princeton Republican.

AN ENGLIGHTENED HISTORIAN.-A new His

tory of the United States, by an Englishman, said to following. The writer must have ob-tained his information from Grattan, late Eng-lish Consul at Boston:

iish Consul at Boston:

"Before I went to Amerca, I had heard much of American natural scenery; but I confess I was sadly disappointed when I came to see it myself. I have traversed the country from the colonial dependence of Her Most Gracious Majesty, in Canada, to the Rocky Mountains and I saw nothing that could be called worth of the artist's or peet's observation. It is true that Canada has some charming accenery which has been improved by Reifsich as the confession of the artist in the confession of the service of the confession of the artist's or peet's observation. It is true that Canada has some charming accenery which has been improved by Reifsich to the confession of the confes of the artiss's or poet's observation. It is truthat Canada has some charming seenery which has been improved by British taste and art—the natural consequences of the refinement an cultivation of the inhabitants; but wheneve one crosses into the States, theeountry exhibit either wild forests or naked prairies, both cwhich are dangerous to travel through, in consequence of the quantities of roracious animal they contain. A distinguished member of the United States Parliament informed me that railroad train, last year, was attacked by drove of rancoons, while crossing a prairie, an every one of the passengers destroyed. Thes raccoms are the terror of this wild country and have depopulated thousands of miles of itsurface. "uncontaminated by even the suspending Know-Nothing approval."

Around it we must of course pass until we should find the outlet. So we turned up to the right and pressed on with as much resolution as could be expected. Yet we felt that our duty, as Christian men, was to press on as long as we could stand, and leave the issue with God.

It had now been four days since we ate a meal. All we had to ate in the meantine was one frog a-piece, four clams and a few wild berries, whose acid properties and bitter taste had probably done us more harm than good. Our strength was beginning to fail very fast, and our systems were evidently about to undergo an extraordinary change. I did not perdergo an extraordinary change. Well, we turned the raft around, and poled her back towards the place where we had entered this last lake. The Corn Crop—The Pork Trade
Prospectively.

(From the Chemnati Price Current.)

During the past week we have received information, from various localities, in the West, regarding the present state of the Corn crop and not a little about Hogs. Without going into detail, we will give the points in a brief summary. In this State, except in light sand soils, the Corn crop is much better than was expected a month ago, and, generally speaking, is a full average, taking into consideration, the greater breadth of land planted. In light sandy soil, however, it never recovered from the effects of the drougth in July, and in all such cases, the yield will not be over half an average, but the quantity of such land is small, and, consequently, the effect will not be felt. In Indiana, the crop is excellent, and in all the Wabash country, is unusually heavy, the ears being longer, and better filled than usual. Indeed, we have no complaints from any portion of that State; in all parts, the crop appears to be satisfactory. A good crop of Wheat has been sown, and it looks well.

was supposed would not mature before the frost would come, is now nearly out of danger, and generally exceeds the expectations of the farmer.

In lowa, there is considerable variety in the crop; in the northern portion of the State we hear of the injury done by the frost about the list of September, and some represent it serious, whits others any it was but slight, as the stalks and ears were not injured, only the leaves. We have not heard from this State fully enough as vet, so as to be able to speak of the crop very definitely.

In Missouri, the crop is pretty good; though like lows, we have not heard from many points in that State.

In Kestucky, the crop is represented a fair average, and is fully matured, the quality being excellent.

In Virginia the corn crop, we learn, is a partial failure, and not over two-thirds of last year's crop. and 71/672c for trejected. The project is a good one, and will no doubt receive proper attention by the Directors of the Board of Trade. It is nothing more nor less than what we will have to come to at last, and the sooner the better for all parties.

The Grain Trade in Canada West.—The Toronto Globe of the 6th contains the following:

The movement in grain continues to be general, although hardly increasing as fast as was anticipated. The receipts of wheat at this point for the week would amount to not much less than 48,000 bushels, while the deliveries of barley have amounted to quite 45,000 bushels. Of other grains, the receipts have been limited. For the wheat not less than \$50,000 for other grains, say \$8,000, and for cattle and other less than \$80,000 has been realized, and for the barley \$80,000; for other grains, say \$8,000, and for cattle and other descriptions of produce, say \$5,000 more. In all, not much less than \$80,000 has been paid into the country for this point alone during the week. From London, nearly as large deliveries are said to have been made, and at all ports on the north shore of Lake Ontario there have been large shipments. The general movement in produce is the best thing that could happen the Province at this time, and the commerce of the country is rapidly beginning to feel its effect.

UMBERMAN'S EXCHANGE

In Virginia the corn crop, we learn, is a partial failure, and not over two thirds of last year's crop.

We have no very definite advices from Tennessee, but from what we have, our impression is the crop is moderately good, though in some places it is short, consequent upon the drought. In all the places we heard from, hogs are being generally fed with greaf care and industry, and it is exceedingly difficult to purchase stock hogs, showing that the owners feel satisfied they are Tolly' able to feed all they have. The reverse was the case at this time last year. In many places the farmers have been feeding with the green corn since the last of September.

In some parts of Indiana stock hogs are scarce and in demand, as high as 4ic gross having been paid for them. There seems to be no speculation going on, and we hear of no contracts being made. The impression is general with the farmers that they will obtain high prices for their hogs, but all those who went in so freely last fail are now holding off. The indications are that the number of hogs brought to market will be as great as last year, and that their condition will be far better.

In this market there have been no contracts made, so far as we have heard, though there are buyers for November at \$5.75, and we understand that one party offers \$6, but it is generally supposed that they want them to fill those contracts made at \$6.25 to 6.75 last season, for delivery the coming November. The present active demand for Bacon, and bareness of the market of Hains, together with those contracts, it is supposed, will make the market open high, probably \$6, as many think, but the greater majority of dealers are determined to hold back until prices rule at a safer point, and this point is fixed in their minds at \$6 or therebouts.
